Drivers To Slow Down and Take the Road Safety Pledge.

"Hamilton roads are shared by motorists, cyclists and pedestrians alike; everyone has a shared responsibility to follow the rules of the road. This campaign, however, is asking drivers in particular to be aware that speed kills. Slow down, be respectful and take the pledge to keep our roads safe." Take the Pledge by following the link <https://www.hamilton.ca/streets-transportation/driving-traffic/road-safety-pledge>.

Hi Dave:

Congratulations on the approval of the Vision Zero report! Big achievement!

Your TES Collision Module is going to be ready with all historical collisions by the end of the week the latest.

I suggest having a meeting to discuss the next steps for the safety module and how we can feed data to your open data platform as well as the heat maps.

One of the important items is to import your historical traffic volume data into the TES Software.

We are available on Tuesday Feb 12 and Thursday Feb 14th in the AM (anytime after 8:30 AM) for the meeting if you are available and agree to meet.

I look forward to working with you and your staff on this.

Best Regards,
Pedram

Subject: TES

Good Morning Pedram

Public Works Committee approved our Vision Zero report yesterday and will now go to Council for final approval. As part of this report, it gives us the authority to proceed with purchasing the TES Safety Module. I also understand you are working on finalizing the data base for our 10 year collision history.

Tomorrow we will be at General Issues Committee and presenting our Collision Report. As we have discussed, we are looking to open our data through the Cities Open Data Platform and the creation of Heat Mapping through our GIS system. Once the report is approved tomorrow, there will be a big push to get this all up and running quickly.
