I'm glad it went well,

Well lots of urgent needs these days, uhhhhhhhhh, ok, please let me know if there are any issues. We really need to get it up and running full steam ahead. I will also get working on the safety module. I know you sent me an estimate previously, but can I ask you for a new one, the final report will be approved at Council tomorrow night, so I want to get moving on the purchase 😊.

See you on the 14th, Don't forget the Flowers!!! LOL

Drivers To Slow Down and Take the Road Safety Pledge.

“Hamilton roads are shared by motorists, cyclists and pedestrians alike; everyone has a shared responsibility to follow the rules of the road. This campaign, however, is asking drivers in particular to be aware that speed kills. Slow down, be respectful and take the pledge to keep our roads safe.” Take the Pledge by following the link <https://www.hamilton.ca/streets-transportation/driving-traffic/road-safety-pledge>.

Hello Dave:

Thanks for the follow up.

I think the training was good. The staff were engaged and eager to learn. We had many hands-on activities.

Similar to our past experience, there were folks who got it very fast and were comfortable. A few felt overwhelmed. But, with more training and practicing, they will feel comfortable too. We will do more on-site and online training for sure.

I sent you an email about the historical collision data. We should be up and running next week.

If you have any urgent needs, please let me know. We are here to help.

Thanks,

Pedram

Hi gents

How did the training go today? Sorry I wasn't able to make it but I'm tied up in the RHVP stuff. Do we now have the 10 year data in our system?

David

Pedram,

Great meeting yesterday and I'm excited about how things are going forward and the items TES is proposing to assist municipalities in reporting collision information.

I want to introduce you to Jeff Sherriff, he is our computer brain child, and has been working on some examples of mapping for collisions and graphing we would like to produce going forward. You mentioned TES is going to be preparing mapping of collisions like a heat map, so I would ask Jeff to share with you some of the things he has been working on and what we were thinking of making available to the public.

Hello Bryan:

It was great meeting you this morning! We really look forward to working with you.

Would you be able to share the 2017 annual safety report you put together?

Thanks so much,

Pedram
